Celebrate WaterSense

At First Supply we're celebrating water conservation all month with 31 ways to conserve.

- #1 Upgrade to air-cooled appliances for significant water savings.
- #2 Run your clothes washer and dishwasher only when they are full.
- #3 If your shower fills a one-gallon bucket in less than 20 seconds, replace the showerhead with a water-efficient model.
- #4 Buy new appliances that offer cycle and load size adjustments.
- #5 A minute or two less in the shower saves up to 150 gallons/month.
- #6 Upgrade older toilets with water efficient models.
- #7 Collect water from your roof to water your garden.
- #8 Install a rain sensor on your irrigation controller.
- #9 Grab a wrench and fix that leaky faucet to save 140 gallons/week.
- #10 Remember to check your sprinkler system valves periodically for leaks and keep the sprinkler heads in good shape.
- #11 Use a water-efficient showerhead to save 750 gallons/month.
- #12 Use a commercial car wash that recycles water.
- #13 Turn off water while brushing your teeth to save 25 gallons/ month.
- #14 Make sure there are water-saving aerators on all of your faucets.
- #15 Install an instant water heater near your kitchen sink so you don't have to run the water while it heats up.
- #16 If your dishwasher is new, cut back on rinsing. Newer models clean more thoroughly than older ones.
- #17 When you save water, you save money on your utility bills too.
- #18 Make sure your swimming pools, fountains, and ponds are equipped with recirculating pumps.
- #19 Winterize outdoor spigots to prevent pipes from leaking or bursting.
- #20 Insulate hot water pipes for more immediate hot water.
- #21 Support projects that use reclaimed wastewater.
- #22 If your toilet was installed before 1992, reduce the amount of water used for each flush by inserting a displacement device in the tank.
- #23 Setting cooling systems and water softeners for a minimum number of refills saves both water and chemicals
- #24 Washing dark clothes in cold water saves both on water and energy while it helps your clothes to keep their colors.
- #25 When shopping for a new clothes washer, compare resource savings among Energy Star models. Some of these can save up to 20 gallons per load, and energy too.
- #26 Aerate your lawn at least once a year so water can reach the roots.
- #27 Turn off water while you shave and save up to 300 gallons/month.
- #28 Consider washing your face or brushing your teeth while showering.
- #29 Reuse your towels while staying in a hotel or even at home.
- #30 Re-route your gray water to trees and gardens rather than letting it run into the sewer line. Check with your city codes, and if it isn't allowed in your area, start a movement to get that changed.
- #31 Don't let the water run while you lather, when washing your hands.
